

Scan Conversion for iPhone and iPad

Convert Video from Your Mobile Device into SDI Digital Video

Connect your iPhone™ or iPad® to the BrightEye Mitto and output HD or SD SDI video for use in production or post.

High Quality Scaling

BrightEye Mitto™ is a high performance scan converter that provides a new way to take just about any source to 3G, HD or SD SDI video. The BrightEye Mitto converts iPhone or computer material to SD and HD SDI video for input to a router or production switcher for use in video production applications.

Use a standard cable from Apple to connect the VGA or HDMI port on the iPhone or iPad to the Mitto's DVI input. Mitto automatically scales the iPhone video to HD, SD or 3 Gb/s video. BrightEye Mitto has a reference input allowing the video output to be timed to house which is critical for use in broadcast applications.

A superior quality scan converter, BrightEye Mitto uses new, proprietary scaling technology and exclusive multi-tap filtering to ensure the video output looks superior. The filters automatically adjust in accordance with the conversion being performed.

The BrightEye Mitto™ family of high performance scan converters are used for the most demanding applications including high-end military, medical, classroom, broadcast, church and corporate. Convert YouTube™, Skype™ video, weather radar, viewer emails and maps to video. Ensemble uses the latest technology in its proprietary upconversion and filtering and that means you have the best looking video.

Six different models, with a feature set and price to meet any need:
