Using LINC with TC400D

1. Can use LINC or Editor, not both as same port is used on TC400D.

2. There is no register storage with LINC. If Editor can save to EDL this function is lost when LINC uses the Editor port.

3. An Abekas LINC cable is used to connect to the TC400D.

4. On the A82 ASSIGN device # for TC400D to be used with LINC.

5. If a CP10 is available it may be better to use this rather than the LINC interface.
